Please find below and/or attached an Office communication concerning this application or proceeding.

1) Responsive to communication(s) filed on		Application No.	Applicant(s)					
Juliet C. Switzer Juli		10/809,675	LIEW, CHOONG-CHIN					
The MAILING DATE of this communication appears on the cover sheet with the correspondence address — Period for Reply A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. Fallers on prime may be availated under the provisions of 37 CFR 1.13(b), in an event, however, may reply be timely find. 1 If NO period for reply is perified show, the maintainum stabilatory period will peply and will expire SN (5) MONTHS from the mailing date of this communication. 1 Fallus to reply with the set or exidenced period for explying by stabled, capacity. By stabled, capacity and system and path of the mailing date of this communication. 1 Fallus to reply within the set or exidend period for explying by stabled, capacity. By stabled, capacity. By stabled, capacity. 1 Fallus to reply within the set or extended period for explying by stabled, capacity. By stabled, capacity. 1 Fallus to reply within the set or extended period for explying. By stabled, capacity. 1 Fallus to reply within the set or extended period for explying by stabled, capacity. 2 Fallus to reply within the set or extended period for explying stabled. 1 Fallus to reply within the set or extended period for explying stabled. 2 Fallus to reply within the set or extended period for explying stabled. 2 Fallus to reply within the set or exploration. 2 Fallus to reply within the set or exploration is not reply fired. 3 Fallus to reply fired. 4 Fallus to reply fired. 5 Fall	Office Action Summary	Examiner	Art Unit					
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extractions of tension by the arelated another the patretisons of 37 CFR 1 138ta). In no event, however, may a reply be timely filled. - Extractions of tension by the arelated another the patretisons of 37 CFR 1 138ta). In no event, however, may a reply be timely filled. - Extraction of tension is provided by the patretison of 37 CFR 1 138ta). In order, however, may a reply be timely filled the second of the patretison of the		Juliet C. Switzer	1634					
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. Entermose from replyse available under the proteiness of 37 cFt 1136b. In an event, however, may a reply be finely filed If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (8) MONTHS from the mailing date of this communication. Fallute for reply will publish the sof or extended period for reply will, by stations, cause the application become ABANDONEO (30 U.S.C. § 133). Any reply received by the Office later than these months after the mailing date of this communication, even if timely filed, may reduce any eventre placent time disjutants. See 37 CFR 1.70(b). Status 1) Responsive to communication(s) filed on								
WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. Extensions for mem rups evaluate under the proxisions of 37 ER1 1:38(b). In ne evant, however, may a reply be timely flied after 50X (b) MCDTTS from the mailing date of this communication. Failus to represent you think to set or extended part of for regiver to the proximal set of the communication								
1) Responsive to communication(s) filed on 2a	 WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-33 and 48, drawn to methods for identifying markers for osteoarthritis and methods for diagnosis or prognosis of osteoarthritis, classified in class 435, subclass 6.
- II. Claims 34-47, drawn to isolated nucleic acid molecules and kits comprising primers for isolating nucleic acid molecules, classified in class 536, subclass 23.1, for example.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product. See MPEP § 806.05(h). In the instant case the products of invention II can be used in a variety of methods, including whole to determine gene expression not related to disease diagnosis or prognosis, nucleic acid purification methods, to express encoded polypeptides in vitro, and as hybridization probes for isolating related sequences in non-human organisms.

Further restriction requirement for groups I and II:

3. Groups I and II each encompass a multitude of different groups which are related to possible combinations of "one or more markers" from Tables 3O and 3AB. Tables 3O and 3AB

Application/Control Number: 10/809,675

Art Unit: 1634

contain the disclosure of hundreds of different putative markers. Claims which require the detection of "one or more" of these markers include thousands of different possible groups which encompass all of the possible combinations of "one or more" markers selected from Tables 3O and 3AB. The claims read on a multitude of groupings of probes, each of which is separate and distinct one from another because they contain nucleic acid sequences that are structurally separate from one another. The search and examination of all possible groups would pose an enormous burden on the examiner and on the PTO search resources. In accordance with MPEP 803.04, if applicant elects group I, applicant should select a single combination of "one or more" markers from Tables 3O and 3AB for detection in the claimed methods. If applicant elects group II, applicant should elect a single combination of "two or more sequences from Tables 3O and 3AB" for prosecution with group II (as required by claim 47). Further, from within that combination, applicant should select a single marker for prosecution in claims that require table 310 and 3AB primers to only a single gene selected from table 31. (for example claim 46).

Page 3

The single elected combination will be examined, and if claims which recite and require the elected combination are found to be allowable, any combination which contains the elected combination will be rejoined prior to allowance. The rejoined subject matter will be allowed provided they are allowable in view of all patent statutes. For example, a claim may be free of the prior art but not compliant with 112 1st paragraph. Any claim which does not specifically refer to particular markers or combinations (for example, claim 1) will be treated as a "linking" claim relative to the claims which refer to particular markers, and the generic claims will be examined as generic claims.

Application/Control Number: 10/809,675

Art Unit: 1634

Upon election of the single combination, applicant should identify the single combination

Page 4

by the names used in the claims and by any other identifiers used within the specification.

Further, applicant should identify basis in the specification for the selected combination and

Tables 30 and 3AB

where in Table 3L the entries related to the selected combination are found.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as demonstrated by their different classification and recognized divergent subject matter and because inventions I-II require different searches that are not coextensive, examination of these claims would pose a serious burden on the examiner and therefore restriction for examination purposes as indicated is proper.

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and a product claim is subsequently found allowable, withdrawn process claims that depend from or otherwise include all the limitations of the allowable product claim will be rejoined in accordance with the provisions of MPEP § 821.04. Process claims that depend from or otherwise include all the limitations of the patentable product will be entered as a matter of right if the amendment is presented prior to final rejection or allowance, whichever is earlier. Amendments submitted after final rejection are governed by 37 CFR 1.116; amendments submitted after allowance are governed by 37 CFR 1.312.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined

Art Unit: 1634

claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103, and 112. Until an elected product claim is found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowed product claim will not be rejoined. See "Guidance on Treatment of Product and Process Claims in light of *In re Ochiai, In re Brouwer* and 35 U.S.C. § 103(b)," 1184 O.G. 86 (March 26, 1996). Additionally, in order to retain the right to rejoinder in accordance with the above policy, Applicant is advised that the process claims should be amended during prosecution either to maintain dependency on the product claims or to otherwise include the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.**

Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.

6. A telephone restriction requirement was not made in this application due to an explicit request by Kathleen Williams stating a preference for not making elections in response to telephonic restriction requirements in the series of cases which includes this application.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and

specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Page 6

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Juliet C Switzer whose telephone number is (571) 272-0753. The examiner can normally be reached on Monday, Tuesday, or Thursday, from 9:00 AM until 4:30 · PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ram Shukla can be reached by calling (571) 272-0735.

The fax phone numbers for the organization where this application or proceeding is assigned are (571) 273-8300. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (571)272-0507.

Patent applicants with problems or questions regarding electronic images that can be viewed in the Patent Application Information Retrieval system (PAIR) can now contact the USPTO's Patent Electronic Business Center (Patent EBC) for assistance. Representatives are available to answer your questions daily from 6 am to midnight (EST). The toll free number is (866) 217-9197. When calling please have your application serial or patent number, the type of

Application/Control Number: 10/809,675 Page 7

Art Unit: 1634

document you are having an image problem with, the number of pages and the specific nature of the problem. The Patent Electronic Business Center will notify applicants of the resolution of the problem within 5-7 business days. Applicants can also check PAIR to confirm that the problem has been corrected. The USPTO's Patent Electronic Business Center is a complete service center supporting all patent business on the Internet. The USPTO's PAIR system provides Internet-based access to patent application status and history information. It also enables applicants to view the scanned images of their own application file folder(s) as well as general patent information available to the public.

For all other customer support, please call the USPTO Call Center (UCC) at 800-786-9199.
